

# IC Application Note No. C-2

<b>Title:</b>	Sodium, Potassium, Calcium and Magnesium in cooling water
---------------	---

<b>Summary:</b>	Determination of sodium, potassium, calcium and magnesium in cooling water using cation chromatography with direct conductivity detection.
-----------------	--

<b>Sample:</b>	Cooling water
<b>Sample Preparation:</b>	Acidification with 100 µL 2 mol/L HNO <sub>3</sub> per 100 mL sample

<b>Column:</b>	6.1010.000 Metrosep Cation 1-2
<b>Eluent:</b>	4 mmol/L Tartaric acid, 1 mmol/L dipicolinic acid
<b>Flow:</b>	1 .0 mL/min
<b>Injection Volume:</b>	10 µL

<b>Results:</b>	Na <sup>+</sup> mg/L	K <sup>+</sup> mg/L	Ca <sup>2+</sup> mg/L	Mg <sup>2+</sup> mg/L
	40.4	4.1	24.9	8.1
